# PMCI – NCLEX Engage Series

A Fully interactive learning experience  
designed for today's students

Prepared and presented by: PMCI Nursing Education

# PMCI – NCLEX Engage Series

Students today require educational experiences that are:

Interactive and compelling, to meet unique learning needs

Deeply immersive, with active learning activities and clinical scenarios

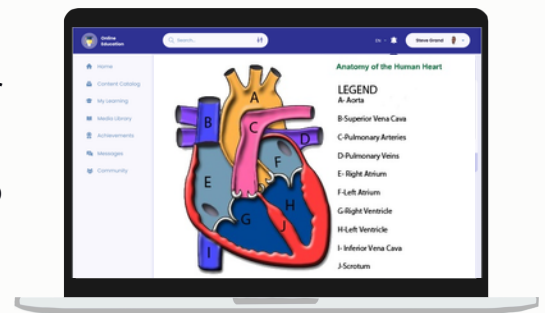

Focused on need-to-know information to prepare for practice

Based on ongoing review of evidence and current practice, such as American Association of Critical Care Nurses AACN Essentials and clinical judgment cognitive functions

The Engage Series delivers these experiences in ways no textbook can. Includes:

- ✔ Evidence-based content with interactive opportunities for students to learn, apply and remediate all in one place
- ✔ Content broken up by clinical scenarios and applications to bridge content to practice
- ✔ Clinical judgment content to develop practice-ready nurses

## Engaging experiences for students

Student-focused multimedia content brings theory to life:

- + An Electronic Health Record (EHR) documentation activities
- + Virtual simulations, case studies, and podcasts to bring real-life clinical scenarios to life and develop clinical judgment skills
- + Strong emphasis on diversity, equity, and inclusion
- + Multimedia videos, pictures, diagrams, 3D animations and auditory sounds
- + Interwoven activities that break up content to provide engaging learning opportunities
- + Tools to support learning: text-to-speech, note-taking, and annotating with highlighting

## Effective resources for educators

Ready-to-use, engaging content and activities:

- + Visibility into students' engagement and learning
- + Focused on need-to-know content, which benefits students with practice preparation
- + End-of-module tests with in-tutorial linked remediation that drives students back to content and activities
- + Test banks with complex item types that measure clinical judgment and reflect Next Generation NCLEX (NGN) content
- + Activities with virtual application simulations that provide students with real-life practice scenarios and the opportunity to develop clinical judgment skills
- + Ready-to-use teaching resources:
  - » PowerPoint presentations
  - » Prewritten lesson plans
  - » Clinical judgment case studies with concept maps
  - » Self-reflection activities

## The Engage Series includes:

Engage Fundamentals

Engage Community & Public Health

Engage Mental Health

Engage Adult Medical Surgical

Engage Maternal, Newborn,  
and Women's Health

Engage Pediatrics

"Using the Engage Series has definitely impacted the way I teach. I've seen how struggling students have had lightbulb moments in the classroom by being able to do active learning through Engage."

# NCLEX Engage: Fundamentals

When your students grasp nursing fundamentals, you set them up for success in all future nursing courses. By using this essential resource, which integrates PMCI Skills Modules, you give students:

- + Confidence and consistency in skills
- + A basic understanding of clinical judgment

## 7 units | 40 modules

### Unit 1: Nursing Practice

- Nursing Foundations
- Scope and Standards of Practice

### Unit 2: Health Care Systems

- Health Care Delivery
- Health Promotion, Wellness, and Disease Prevention
- Health Policy

### Unit 3: Professional Nursing

- Communication
- Documentation
- Ethical and Legal Considerations
- Professionalism and Leadership

### Unit 4: Clinical Decision-Making

- Clinical Judgment Process
- Priority-Setting Frameworks
- Managing Client Care

### Unit 5: Foundational Concepts of Nursing Practice

- Collaboration and Teamwork
- Evidence-Based Practice
- Informatics
- Patient-Centered Care
- Quality Improvement
- Safety
- Infection Control and Isolation
- Complementary and Integrative Health
- Medication Administration
- Mobility
- Client Education
- Vital Signs

### Unit 6: Psychosocial Concepts for Nursing Practice

- Human Growth and Development
- Inclusion, Equity, and Diversity

- Grief
- Self-Concept
- Stress and Coping

### Unit 7: Physiological Concepts for Nursing Practice

- Comfort, Rest, and Sleep
- End-of-Life Care
- Elimination
- Fluid, Electrolyte, and Acid-base Regulation
- Gas Exchange and Oxygenation
- Hygiene
- Nutrition
- Pain
- Sensory Perception
- The Surgical Client
- Tissue Integrity

*"I really appreciate the inclusiveness of Engage Fundamentals. The vital signs unit is very detailed but includes interactive resources in the narrative, such as lung sounds or blood pressure measurements. It is well-written."*

— DEREK PATE - CURRICULUM DEVELOPER

# NCLEX Engage: Community & Public Health

A day of clinical can't compare to the realistic — and often hard-to-come-by — experiences in the virtual world of Engage Community & Public Health. It helps students:

- + Shift from focusing on individual care to the “big picture” of population health
- + Learn policies based on theories, historical influences, and principles of community and public health.

## 6 units | 18 modules

### Unit 1: Foundations of Community and Public Health Nursing

- Introduction to Community, Population, Public, and Global Health
- Historical Influences on Community and Public Health Nursing
- Principles in Community and Public Health Nursing

### Unit 2: Drivers of Health

- Individual Influences
- Social Influences
- Economic Influences
- Environmental Influences

### Unit 3: Using the Evidence

- Evidence-based Practice
- Epidemiology
- Prevention and Control of Diseases and Illnesses

### Unit 4: Improving the Community's Health

- Community Program Planning, Implementation, and Evaluation
- Health Education
- Emergency Preparedness and Management

### Unit 5: Individual and Family Well-Being

- Family
- Children
- Adults

### Unit 6: Populations at Risk for Disruptions in Well-Being

- At-Risk and Vulnerable Populations and Related Effects on Health
- Violence and Abuse

*“I really like how there are multiple activities for students; they allow them to increase their clinical judgment. It is all so visually appealing, which students really like.”*

- FAITH RAMIREZ RN | LEAD NCLEX INSTRUCTOR

# NCLEX Engage: Adult Medical Surgical

Students learning adult med-surg content often struggle with the complexity and challenges of integrating knowledge with practical application. This virtual world gives students:

- + A deep understanding of pathophysiology, manifestations, and clinical judgment to make sound decisions
- + Learning with current evidence on diseases and injuries, including critical care conditions.

## 5 units | 26 modules

### Unit 1: Medical Surgical Concepts

- Professional Nursing
- Wellness to Illness Continuum
- Illness

### Unit 2: Comfort and Dignity with Death

- End of Life

### Unit 3: Alterations in Health

- Alterations in Endocrine Function
- Alterations in Gas Exchange
- Alterations in Digestion and Bowel Elimination
- Alterations in Kidney Function and Elimination
- Alterations in Hematologic Function
- Disrupted Homeostasis
- Alterations in Immunity and Inflammatory Process
- Cancer

- Alterations in Mobility
- Alterations in Cognition
- Alterations in Neurologic Function
- Alterations in Spinal Cord Function
- Alterations in Sensory Perception
- Alterations in Cardiovascular Function and Perfusion
- Alterations in Sexual Function
- Alterations in Tissue Integrity

### Unit 4: Surgical Nursing

- Caring for the Surgical Client

### Unit 5: Critical Care Nursing

- Introduction to Critical Care and Emergency Nursing
- Critical Alterations in Gas Exchange
- Critical Alterations in Perfusion
- Critical Neurologic Dysfunction
- Critical Endocrine Dysfunction

*“The difference maker with Engage is that it meets students where they are. There’s no longer reading textbooks for hours. It’s very active learning so it engages them through videos, podcasts, and even quizzes at the end that prepares them to come to class and actively put those concepts into practice.”*

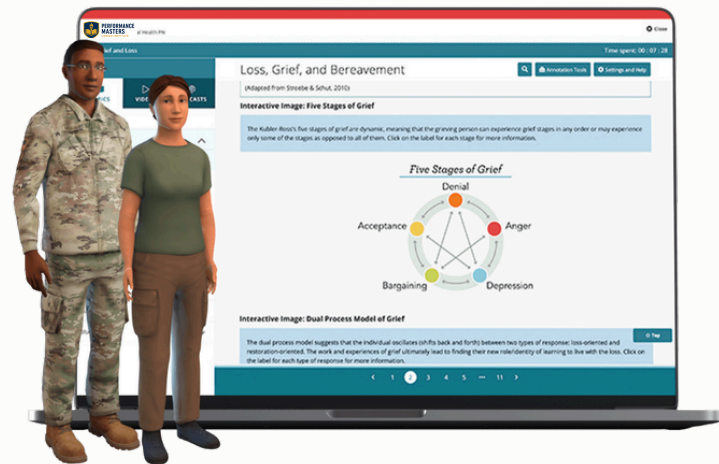

**- NATHAN KLEMM | TECHNOLOGY/PLATFORM SUPPORT SPECIALIST**

# NCLEX Engage: Mental Health

The nuances of mental health require more practice than a nursing student is likely to get without supplemental learning.

Prepare them for clinical and professional practice with this resource that helps them:

- + Develop and understand therapeutic communication skills
- + Identify and recognize underlying biases and fears
- + Gain mental health clinical exposure through realistic clients and scenarios.

4 units | 22 modules

## Unit 1: Foundations of Mental Health Nursing

- Foundational Concepts of Mental Health Nursing
- Client and Mental Health Team Member Safety: Legal & Ethical Consideration
- Evidence-Based Practice in Mental Health Nursing
- Mental Health Theories & Therapies
- Continuum of Treatment

## Unit 2: Building Nurse-Client Relationships

- Building Therapeutic Relationships
- Nursing Process
- Psychopharmacology

## Unit 3: Social, Emotional, and Behavioral Concerns

- Physiological and Psychological Responses to Stress
- Grief and Loss
- Abuse, Aggression, and Violence

## Unit 4: Nursing Practice for Clients with Mental Health Disorders

- Anxiety, Obsessive-Compulsive, and Related Disorders
- Trauma, Crisis, Disaster, and Related Disorders
- Somatic Symptom and Dissociative Disorders
- Personality Disorders
- Mood Disorders and Suicide
- Schizophrenia Spectrum Disorders and Psychosis
- Neurocognitive Disorders
- Neurodevelopmental Disorders
- Disruptive Behavioral Disorders
- Substance-Related and Addiction Disorders
- Eating Disorders

*“In providing opportunities for interactive and multimedia-rich content — embedded videos, animations, quizzes, and interactive simulations — digital solutions improve student motivation, engagement, and knowledge retention.”*

Kuppuraj, V. (2020). Role of multimedia on motivation and knowledge retention. *The International Journal of Analytical and Experimental Modal Analysis*, XII(IV).

# NCLEX Engage: Pediatrics

Understanding the complexities of pediatric diseases and treatments and mastering atraumatic care for pediatric clients and their families can be challenging. Support your students with:

- + A focused, interactive learning experience across 25 modules, encompassing essential pediatric content that is necessary for practice, and an emphasis on therapeutic communication and techniques
- + Proficiency in caring for pediatric clients and their families through various learning activities while developing clinical judgment cognitive function skills

**4 units | 25 modules**

## Unit 1: Overview of Pediatric Nursing

- Pediatric Nursing Today
- Genetics and Genomics in Pediatric Nursing
- Health Assessment of Pediatric Clients

## Unit 2: Caring for Pediatric Clients Across the Lifespan

- Newborns: 2 to 28 Days
- Infants: 1 Month to 1 Year
- Toddlers: 1 to 3 Years
- Preschoolers: 3 to 6 Years
- School-Age Children: 6 to 12 Years
- Adolescents: 12 to 20 Years

## Unit 3: Specific Considerations in the Pediatric Population

- Communicable Diseases and Immunizations

- Pediatric Clients in the Hospital Setting
- Disabilities and Chronic Illness
- Terminal Illness and End of Life

## Unit 4: Health Alterations in the Pediatric Population

- Sensory Nervous System
- Cognitive System
- Respiratory System
- Cardiovascular System
- Gastrointestinal System
- Endocrine System
- Immune System
- Genitourinary System
- Neuromuscular and Musculoskeletal System
- Neurological System
- Hematological System
- Integumentary System

*"A primary advantage of digital solutions is their potential to reduce costs for students — an important aspect for financially insecure students having trouble paying for their textbooks."*

— Welding, L. (2023, March 27). Average cost of college textbooks: Full statistics. Retrieved from BestColleges: <https://www.bestcolleges.com/research/average-cost-of-college-textbooks-statistics/>
